## Refurbished homes go on sale in York – take a look inside

Former MOD properties in Strensall have been given ‘a new lease of life’ – and are now going on sale.

The two- and three-bedroom houses have been refurbished by property developer Annington and are being marketed by Your Move Anscombs.

Managing director Scott Anscomb said: “Strensall has a lot to offer potential buyers. It is perfectly positioned in a charming rural setting, while only being a short drive away from York city centre.

“Data from Rightmove shows that stock levels are less than half compared to previous years, and despite the lack of homes for sale, demand from buyers remains high.

“We expect these properties to be very popular and enable many buyers to take their long-awaited step onto the property ladder.”

They are off Howard Road

Located off Howard Road in Strensall they are presented as “an opportunity for service personnel and first-time buyers to purchase their first home in a charming village.

“Residents are within walking distance of grocery shops, a post office, doctor’s surgery, football pitches and a Special Area of Conservation, Strensall Common.

“The Robert Wilkinson Primary Academy is in the village and the properties are in the catchment for the highly regarded Huntington Secondary School for which courtesy buses are provided for students to and from the village.”

Prices start from £235,000 for a two-bedroom semi-detached home.

Louise Saunders, sales and marketing manager for Annington, said: "The village provides the perfect location for this development as it's positioned with established public transport links and 20 minutes from the larger city of York, but it's nestled in a picturesque location of the countryside so you get the best of both worlds."
