better decisions for better environments

New play scheme by eibe for Annington Homes

eibe were chosen to design and install a new play area for Annington Homes' residential project at Bordon.

1/1

Sector	Housing, private
Project type	New build
Project location	South East England
Contract value (£)	60,000
Client	Annington Homes

eibe were chosen to design and install a new play area for Annington Homes' residential project at Bordon.

The client

With over 40,000 homes worth in excess of £7 billion in its portfolio, Annington is one of the largest providers of privately rented housing in the UK. From one-bedroom apartments through to eight-bedroom houses, Annington specialise in building family homes, predominantly for the country's military personnel.

Like eibe Play in the UK, Annington has more than 20 years' market experience and expertise, so teaming up on a recent project was a real joy, culminating in a delightful play area in the South East.

The project

St Lucia Park in Bordon, Hampshire borders a pleasant country park and Annington's housing estate sits on ground that used to belong to an old army barracks. Contending with some quite extreme weather conditions, the eibe team pulled out all the stops to complete the £60,000 scheme during the variable winter season.

Play equipment used

Working alongside Project Manager, Edward Key, the equipment specified included an ecorino Kibo unit, an ecorino Kamet, some Swings, a Floor Trampoline and a Swirl Spinner.

With a bright, colourful appeal, the units blend harmoniously with the natural environment and the products are sure to be enjoyed for years to come.
